Your resource for psychiatric mental health nursing. 2019 APNA New York Chapter Conference. Flourishing with Disruption: Cultivating Wisdom, Opportunity, Knowledge, and Empowerment in Uncertain Times

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

"Oh, those naughty rakes. With their wicked winks, sensual smiles, and bad boy habits, you just can't take them out in polite society. But who wants to go out when you can stay in. . . ? Stolen Pleasures Sebastian Blake, Earl of Merrick, long ago fled the responsibilities of his title to become the infamous pirate, Captain Phoenix. But the booty he's just captured on a merchant ship is a fierce tempered minx who claims to be a bride. . . his bride, married to him by proxy on behest of their fathers. He could shame his hated family and return his beautiful wife untouched, but no treasure has ever proved more tempting to Sebastian, and making their marriage a true one--in every sense--is his one urgent desire . . . Lucien's Gamble Lucien Remington's reputation as a debauched libertine who plays by no one's rules--in business or the bedroom--is well deserved. He gets what he wants, social repudiation be damned. But society can keep from him the one thing he truly desires, the untouchable Lady Julienne La Coeur. Until she sneaks into his club dressed as a man and searching for her irresponsible brother. Suddenly she's in Lucien's grasp, his to take, and his mind is filled with the most wickedly sinful thoughts. A gentleman would walk away from the temptation she presents. But then, Lucien has never claimed to be a gentleman. . . Her Mad Grace Hugh La Coeur never wanted to be the Earl of Montrose. Wine, women, and a hefty wager are preferable to responsibility of any kind. It's certainly preferable to spending the night in an eerie, neglected mansion owned by a legendary madwoman. The duchess's companion, the fiercely independent Charlotte, is another matter altogether. Hugh would be happy to spend as many nights in her bed as possible. He knows she's hiding terrible secrets, but for once in his life, Hugh has the desire to take on someone else's burden as his own, no matter what the danger. . . They're mad, bad, and totally irresistible. . .

Widely regarded as the standard reference in the field, this state-of-the-art handbook offers a comprehensive analysis of developmental, clinical, and social aspects of mental health from birth to the preschool years. Leading authorities explore models of development; biological, family, and sociocultural risk and protective factors; and frequently encountered disorders and disabilities. Evidence-based approaches to assessment and treatment are presented, with an emphasis on ways to support strong parent-child relationships. The volume reviews the well-documented benefits of early intervention and prevention and describes applications in mental health, primary care, childcare, and child welfare settings. The chapter on psychopharmacology has been updated for the paperback edition.

Evidence-based Public Health: Effectiveness and efficiency continues the themes raised in Public Health Evidence - tackling health inequalities. Written by the same author team, this book is a comprehensive reference to evidence-based approaches in public health. It covers the context and role of evidence-based public health in England; frameworks for evaluating the effectiveness and cost effectiveness of public health policies and interventions; diversity, vulnerability and risk as a focus for understanding the role of social context in influencing health-related behaviours; approaches and methods to generate and synthesize evidence of what works to improve health and tackle health inequalities; current best available evidence on the effectiveness of a diverse range of interventions; and the role of evidence-based guidance and standards in changing policy and practice. This book will be essential reading for all those concerned with advancing an evidence-based approach to public health, and tackling health inequalities, including academics, researchers, policy makers, postgraduate students in public health, and anyone involved across different sectors of public health, including local government, health and education, Whilst based on work done in England by NICE, the book contains generic principles which are applicable internationally.
