December 6, 2016. Eli Anapur. Perception
in art stands for a complex relation
between visual stimuli and a personal
understanding of them. It is a theoretical
postulate that aims to clarify the relation
between artworks and individual opinions
and evaluations. Far from being a
universally established matrix of
understanding art, perception is
conditioned by a context from which
observation and evaluation are made.

Arnheim, R.: Books

Visual perception is the ability to interpret the surrounding environment using light in the visible spectrum reflected by the objects in the environment. This is different from visual acuity, which refers to how clearly a person sees. A person can have problems with visual perceptual processing even if they have 20/20 vision. The resulting perception is also known as

Art & Perception will serve those across several areas of science studying the way works of art and design affect us perceptually, cognitively, or physiologically. The editors are also keen to receive submissions from practicing artists, and those in related fields of history and theory, which offer an artistic perspective on perception. Homepage
