When cutting, burning excess calories during your workouts is something to aim for. Modify your training routine to make it more dynamic and keep your heart-rate up. Reducing rest times and using super-sets can be a good idea. Keep protein intake up. Protein is more important on a cut than a bulk because it helps to spare muscle during tissue wasting.

~~Bodybuilders Top 10 Tips to Help You Cut | Maximuscle@~~

A Beginners Guide to Bulking. The basic principle is to eat more food than your body requires to maintain your weight. For example if you calculate you roughly consume 2500 calories each day and are not gaining or losing weight then I would just add an extra 300-400 calories each day plus a structured training plan in order to gain Lean Body Mass (muscle with minimal fat).
