I took a position with the Scintilla Magneto Division of the Bendix Aviation Corp. with headquarters at N.Y. They had bought out the Hurley Townsend spark plug company in New York City and was moving operations to Sidney. This was an aviation spark plug company and I was hired to introduce it to the airlines, Navy and Air Force.

~~Scintilla Magneto Division, Bendix Aviation Corporation, 1935~~

Ignition is a Scintilla DLFN-6 magneto unit which combines two magnetos into one unit driven by a single drive shaft. Calculations of magnetos produced by Scintilla during World War II: · An estimate of 40,000 Allison engines, produced from 1942 to 1945, is thought to be reasonable. Each airplane had one or two engines.

The Bendix magneto, also known as an ignition magneto, was developed by Andre Boudeville but perfected by Robert Bosch and Frederick Richard Simms. The magneto is a permanent electrical generator that produces high voltage for spark plugs. The magneto is used in aviation because it is more reliable than a battery coil system.

With some S-20 series Bendix magnetos, you must remove the P-lead from the magneto and place a conductor of some sort in the hole where the P-lead belongs.Most A&P mechanics have made a Bendix magneto timing lead from an old set of Bendix P-leads. If you have the need and can get your hands on a set of these little gems they will prove helpful.
