CBSE Class 12 Biology Revision Notes Chapter 3 Human Reproduction Humans are sexually reproducing and viviparous. The reproductive events in humans include formation of gametes (gametogenesis), i.e., sperms in males and ovum in females, transfer of sperms into the female genital tract (insemination) and fusion of male and female gametes (fertilisation) leading to formation of zygote.

Humans reproduce through sexual mode and are viviparous. Before the event of fertilization, a series of events take place, which differs in males and females. Gametogenesis in males is called spermatogenesis, whereas in females it is oogenesis, both of whose outcomes are different, i.e., sperm and an ovum respectively.
