Section 18-1 : Finding Order in Diversity To study the diversity of life, biologists use a classification system to name organisms and group them in a logical manner. In binomial nomenclature, each species is assigned a two-part scientific name. Linnaeus's system of classification uses seven taxonomic categories.

Chapter 18 Classification

Taxonomy is the science of grouping organisms according to their morphology and evolutionary history.

Carolus Linnaeus originated a seven-level hierarchy system for classifying organisms according to their morphology.
