Bergin and Bergin's CHILD AND ADOLESCENT DEVELOPMENT IN YOUR CLASSROOM: CHRONOLOGICAL APPROACH, prepares future teachers to create an environment that promotes optimal development for all children. Addressing concerns stated in NICHD and NCATE's joint report (i.e., that child development courses need to offer more realistic illustrations of development concepts or better tie concepts to the classroom), the book helps college instructors meet the challenge of translating up-to-date research into realistic, high-quality classroom practice. It uses attention-grabbing real-world vignettes, anticipates questions that teachers might ask, provides an easy-to-follow format, and focuses on topics of interest and relevance to teachers, including classroom discipline, aggression, emotion regulation, and many others. This accessible new text also places a strong emphasis on diversity among children, and is ideal for teachers who will be working with children from infancy through high school. Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
