In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world.

Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, Mindstorms is their bible.

Now in its fourth edition, *Modern Trial Advocacy: Canada* is the first and last word in Canadian trial practice. This classic handbook, published by the National Institute for Trial Advocacy, gives practitioners a detailed road map for conducting a trial. Expanding on the original text written by Steven Lubet for an American audience, experienced Toronto trial lawyers Cynthia Tape and Julie Rosenthal guide the beginning advocate in developing a winning case theory through all phases of trial. They explain how to present a case as a story – and powerfully and persuasively tell that story to the jury. *Modern Trial Advocacy: Canada* provides not only Canadian case law and statutes, but also valuable insight into the specific elements of Canadian litigation practice as it presents a realistic and contemporary approach to learning and developing trial advocacy skills. This book offers a sophisticated, theory-driven approach to advocacy training that distinguishes it from other books in the field. The fourth edition has been updated with current citations to case law, statutes, and rules and the latest “best practices” for using technology in the courtroom.
