This book is meant for the new Relationship Managers (RM), Assistant Relationship Managers, Credit Analysts and trainees of banks working in the Corporate Banking units of banks to serve them as a reference guide for preparation of limit applications for approval. It would help them to understand various risks that can affect a company and also the post approval monitoring of the accounts. It provides an overview and is not meant to make the RM an expert on any industry or lending which comes from experience for which he will have to study the industries and develop himself. I have also included self-explanatory checklists that can be of help. As there could be staff transferred from Personal Banking or Operations to the Corporate Units I have added a blank spreadsheet with definitions of some basic components and the products offered for ready reference. I have therefore kept it very simple to understand. When I worked in banks I had no reference book and had to pick up things on my own. That is what prompted me to write this book.

This book is intended for anyone whose job involves writing formal documentation. It is aimed at non-native speakers of English, but should also be of use for native speakers who have no training in technical writing. Technical writing is a skill that you can learn and this book outlines some simple ideas for writing clear documentation that will reflect well on your company, its image and its brand. The book has four parts: Structure and Content: Through examples, you will learn best practices in writing the various sections of a manual and what content to include. Clear Unambiguous English: You will learn how to write short clear sentences and paragraphs whose meaning will be immediately clear to the reader. Layout and Order Information: Here you will find guidelines on style issues, e.g.. headings, bullets, punctuation and capitalization. Typical Grammar and Vocabulary Mistakes: This section is divided alphabetically and covers grammatical and vocabulary issues that are typical of user manuals.
