management of the problems at the source Prevention should be done directly by those designing workplaces and jobs! Our experience comes from constant comparisons between the need to respond to the actual needs of workers and technical staff (who require practical tools, simple and easily applicable in the field) and the need to find answers, solutions, and criteria by experimentally verified reliable methods (being often quite complex). In short, translation of the matter complexity into easily applicable prevention approaches is just one of the main goals of the

Ergonomics of Posture and Movement (EPM) Research Unit, which we founded and in which Enrico and I have operated for many years, under the sponsorship of Don Gnocchi, ONLUS Foundation (IRCCS Santa Maria Nascente, Milan Polo-Tecnologico). Another important goal is to diffuse the knowledge on the matter. Following a series of meetings with colleagues and technicians, at congresses and meetings in different parts of the world, the idea to create an International School of Ergonomics of Posture and Movement was originated. Thus we created the school as an operative section of

include images of household pets. Their appealing presence lends charm to such works while alluding to middle-class prosperity and the growing importance of animals as family members. In many cases, such domestic denizens significantly complement representations of their owners. In certain others, the devotion of individual artists to their pets symbolically enhances their expressions of artistic identity. This enjoyable and informative book focuses on the role of pets in Impressionist pictures and what this reveals about art, artists, and society of that era.

James H. Rubin discusses works in which artists paint themselves or their friends in the company of their pets, including several paintings by Courbet (who was fond of dogs) and Manet (a notorious lover of cats). He points out that in some works by Degas, dogs contribute to the artist's commentary on psychological and social relationships, and that in paintings by Renoir, dogs and cats have playful and erotic overtones. He also offers a theory to explain why Monet almost never painted pets. Drawing on early pet handbooks and treatises on animal intelligence, Rubin

explores nineteenth-century opinions on cats and dogs and compares handbook illustrations to the animals shown in Impressionist works. He also provides fascinating information on pet ownership and on the place of Impressionism in the long history of animal painting.

There are times when hearing a familiar story -- even a story about how your mother fell and broke her arm when she was a little girl -- can be comforting. And so it was for Andy, and for his cat, Frank. Because the important thing is that injuries heal. When they have healed, they
