It is a conceptually based book that stresses meaningful learning over rote memorization. More specifically, the text focuses on the relationships between business events and financial statements. The primary objective is for students to develop and explain how a particular business event can affect the income statement, balance sheet, and the cash flow statement. Did the event cause assets to increase, decrease, or stay the same? Similarly, what was its effect on liabilities, equity, revenue, expense, gains, losses, net income, and dividends? Furthermore, how did the event affect cash flow? These are the big picture relationships that both accounting majors and general business students need to understand to function effectively in the business world. The text contains numerous innovative features that are designed to facilitate the students' comprehension of the events affecting financial statements.
