The revision of the HSE national guidelines for wound management is to ensure that the most up-to-date evidence is available to support the standardisation of care and encourage best clinical practice, and to contribute to improved patient outcomes. These guidelines constitute a general guide to be followed, subject to the medical practitioner's judgement in each individual case. The guideline is applicable for hospitals and healthcare organisations, to ensure that patients

~~HSE-National-Wound-Management-Guidelines-2018~~  
The development of HSE national guidelines for wound management are designed to support the standardisation of care and encourage best clinical practice. These guidelines constitute a general guide to be followed, subject to the medical practioners judgement in each individual case. These guidelines are based upon up to date scientific evidence and expert opinion and will serve to support consistency of treatment and contribute to improved patient outcomes.

~~National-Guidelines-for-Wound-Management-HSE.ie~~  
The purpose of the HSE National Wound Guidelines 2018 is to provide a standardised consistent approach for wound care in Ireland. The guideline will support safe, quality care for patients, who access healthcare across the HSE and HSE funded agencies. This revised publication is informed by international guidelines and aims to support pathways of care for patients with a wound. It is expected that it will be accessible to all clinicians in wound care practice and offer recommendations for ...

Clinical guidelines in wound care can lead to better care for patients, writes Georgina Gethin. The report of patient safety and quality in healthcare has set out a vision for the Irish health service, which aspires to the provision of evidence-based care. 1 In tandem with this, the nursing services directorate of the HSE has launched a blueprint for future nurse education in Ireland. 2 This too emphasises the importance of delivering evidence-based care.
