Learning from Singapore tells the inside story of the country ’ s journey in transforming its education system from a struggling one to one that is hailed internationally as effective and successful. It is a story not of the glory of international test results, but of the hard work and tenacity of a few generations of policy makers, practitioners and teacher trainers. Despite its success, Singapore continues to reform its education system, and is willing to deal with difficult issues and challenges of change. Citing Singapore’s transformation, author Pak Tee Ng highlights how context and culture affect education policy formulation and implementation. Showing how difficult education reform can be when a system needs to negotiate between competing philosophies, significant trade-offs, or paradoxical positions, this book explores the successes and struggles of the Singapore system and examines its future direction and areas of tension. The book also explores how national education systems can be strengthened by embracing the creative tensions generated by paradoxes such as the co-existence of timely change and timeless constants, centralisation and decentralisation, meritocracy and compassion, and teaching less and learning more. Learning from Singapore brings to the world the learning from Singapore—what Singapore has learned from half a century of educational change—and encourages every education system to bring hope to and secure a future for the next generation.

Easing the transition from GCSE to AS level, this textbook meets the 2004 Edexcel specifications and provides numerous worked examples and solutions to aid understanding of key concepts.

This fully revised and updated seventh edition of Commensense Methods for Children with Special Educational Needs continues to offer practical advice on evidence-based teaching methods and intervention strategies for helping children with a wide range of disabilities or difficulties. The advice the author provides is embedded within a clear theoretical context and draws on the latest international research and literature from the field. Coverage includes: learning difficulties and disabilities students with autism spectrum disorders, intellectual disability, physical or health issues, and sensory impairments gifted and talented students developing social skills and self-management behaviour management teaching methods literacy and numeracy curriculum differentiation and adaptive teaching computer-based instruction and e-learning. Peter Westwood also provides additional information and advice on transition from school to employment for students with disabilities, lesson study, e-learning, and computer-aided instruction, and reflects on the important changes made within the latest Diagnostic and Statistical Manual of Mental Disorders (DSM-5).
