The Sidecar Guide contains everything for the sidecar rider, new or experienced, with sections on riding skills, sidecar setup, issues and solutions for handling problems, sidecar selection, accessories, care and maintenance, and much more. The first new sidecar book of it's type to be published in many years, it draws on my many years of experience operating 3WB Sidecars as well as the invaluable contributions made by specialists in the fields of disabled sidecar use and taking your dog in the sidecar. The "go to" reference for people new to sidecars and existing sidecar owners. Both books are written for left and right handed sidecars.

The Complete Idiot's Guide to Motorcycles, Fourth Edition, is the most complete book on motorcycles, covering everything from how to choose and maintain a motorcycle and how to buy appropriate gear, to how to ride safely, and how to make the most out of trips on the open road.

A compilation of 53 profiles of people involved in the motorcycle industry, some famous and some not so well-known.

AdrenalineMoto is an authorized dealer of Parts-Unlimited and claims no ownership or rights to this catalog. The Parts Unlimited 2014 Street catalog is more than "just a book." It is designed to help you and your customers get the most out of your passion for powersports. It showcases the new, exciting, in-demand products, as well as highlighting trusted favorites. The well-organized catalog sections make it easy to find the items you want. And every part is supported with the latest fitment information and technical updates available. Looking for tires? See the Drag Specialties/Parts Unlimited Tire catalog. It has tires, tire accessories and tire/wheel service tools from all the top brands. And for riding gear or casual wear, see the Drag Specialties/ Parts Unlimited Helmet/Apparel catalog. Combine all three catalogs for the most complete powersports resource of 2014.

American Motorcyclist magazine, the official journal of the American Motorcyclist Association, tells the stories of the people who make motorcycling the sport that it is. It's available monthly to AMA members. Become a part of the largest, most diverse and most enthusiastic group of riders in the country by visiting our website or calling 800-AMA-JOIN.

From the publishers of Motorcycle Consumer News, *Shifting Gears at 50* is a one-of-a-kind motorcycling manual for returning and late-entry riders, essentially anyone 40 years old and up who's looking to hit the road on two wheels. Author Philip Buonpastore, a motorcycle journalist and retired US Air Force photographer, helps readers gear up to get back on a motorcycle (or get on one for the first time). In Part 1, "Becoming a Motorcyclist," Buonpastore discusses the basics of buying the right bike, gear, and equipment and getting the bike up to speed. The book continues with a good overview of learning to ride, the importance of taking a road course, venturing out on the first ride, and extending rides to long-distance jaunts. Throughout Part 1 are sidebars by riding-safety instructor and expert Walt Fulton, offering sound advice on safety precautions and execution for every leg of the new and returning rider's journey. The author emphasizes what older riders should be aware of and which factors can affect their rides. Adding lots of great firsthand advice are humorous and helpful stories collected by the author and related by returning riders at various ages, from their late 30s to 60s. In Part 2, Buonpastore shares five of his favorite travelogues covering his long-distance tours around the US, from the American South to the west coasts. This section is illustrated by over 100 of the author's breathtaking photographs of the various locations he toured on his bike. The foreword to the book is provided by best-selling motorcycle author David Hough (author of I-5 Press's *Proficient Motorcycling and Mastering the Ride*). Hough writes, "If you're getting into today's motorcycling at an age your doctor would describe as 'middle aged' or 'senior,' do you yourself a clever favor and read Phil's book."

Men and motorcycles: a story that has vacillated somewhere between cult and cliché for years. Custom bikes, in particular, have a history that is deeply rooted in the spirit of freedom and change of the 1960s, as well as man's primal urge to build something with his own hands--or, in this case, tools. *The Ride 2nd Gear* is a showcase of the power and beauty of these bikes. *The Ride 2nd Gear* presents a stunning selection of recent custom motorcycles, as well as the small, local workshops around the globe in which they are built. Hotbeds of creativity and craftsmanship, these workshops are mostly run by single individuals and attract a small yet devoted community of fans and fellow builders. The custom bike community as a whole is united by its passion for the ride--one so strong that it is now attracting a younger generation. Whether alone or in a group of like-minded friends, in a city or in the countryside, just for the weekend or embarking on a long-distance road trip, these drivers are actively sharing and celebrating pure riding pleasure on their own unique motorcycles that are lovingly crafted with time, dedication, and technical expertise. From limited series to one-offs, *The Ride 2nd Gear* features the brilliant results of this process. Its pages are filled with bikes that offer extraordinary design and driving experiences. In fact, established brands are now acting on trends set by the custom scene whose bikes are often more radical and sophisticated because more attention can be paid to detail and each new idea can be fine-tuned to perfection. Some models shown in *The Ride 2nd Gear* stem from or are

based on classic bobbers and choppers, Italian-style racing machines, plastic Japanese motorcycles, and rare BMWs or Triumphs, which may very well be up to 80 years old. Others are art bikes made for show or futuristic visions inspired by the aesthetics of science fiction, fantasy, or anime. But whether they preserve or radically expand on traditional craftsmanship, these custom machines are more agile, faster, and therefore more fun than anything produced in the past. Journalist and custom motorcycle expert Chris Hunter co-edited both this book and our previous release *The Ride*. Born in England, Hunter now lives with his family in New Zealand, where he runs the motorcycle website Bike EXIF. It is now the world's most popular showcase of custom bikes with millions of pageviews every month and a passionate global following.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
