In the last decade over 6,000 rhinos have been killed in South Africa. Relentless poaching for their horns has led to a catastrophic fall in black rhino numbers. Meanwhile a corrupt South African government turns a blind eye to the international trade in rhino horn. This is the background to Peter Hain's brilliantly paced and timely thriller. Battling to defend the dwindling rhino population, a veteran freedom fighter is forced to break his lifetime loyalty to the ANC as he confronts corruption at the very highest level. The stakes are high. Can the country's ancient rhino herd be saved from extinction by state-sponsored poaching? Has Mandela's 'rainbow nation' been irretrievably betrayed by political corruption and cronyism?

"The aggressive poaching of rhinos needs to be countered with equal aggression. So argued Prince Bernhard of the Netherlands, the founder president of the World Wide Fund for Nature (WWF), at a 1987 meeting with John Hanks, conservation expert and WWF's head in Africa. The result was Operation Lock, a secret initiative funded by Prince Bernhard and staffed by former SAS operatives. Operation Lock set up headquarters in Johannesburg and extended its reach into neighbouring states: Namibia, Zambia, Botswana, Swaziland and Mozambique. Its operatives planned to train game rangers, to pose as rhino horn traders in order to entrap buyers, and to expose the kingpins who were driving the trade. It was a controversial approach, all the more because it was working within apartheid South Africa in the late 1980s. When the existence of the project was finally leaked, WWF denied any involvement, and John Hanks took the fall. In *Operation Lock and the War on Rhino Poaching*, John Hanks finally tells the story of these explosive events from 25 years ago. As a leading international authority on conservation, he also deals with the scourge of rhino poaching up to the present, and gives powerful and controversial criticism of some of the current policies to curb poaching." -- Back cover.

Describes the illegal trafficking of elephant ivory and rhinoceros horns and the implications for these endangered animals.

The planet is currently experiencing alarming levels of species loss caused in large part by intensified poaching and wildlife trafficking driven by expanding demand, for medicines, for food, and for trophies. Affecting many more species than just the iconic elephants, rhinos, and tigers, the rate of extinction is now as much as 1000 times the historical average and the worst since the dinosaurs died out 65 million years ago. In addition to causing irretrievable biodiversity loss, wildlife trafficking also poses serious threats to public health, potentially triggering a global pandemic. The Extinction Market explores the causes, means, and consequences of poaching and wildlife trafficking, with a view to finding ways of suppressing them. Vanda Felbab-Brown travelled to the markets of Latin America, South and South East Asia, and eastern and southern Africa, to evaluate the effectiveness of various tools, including bans on legal trade, law enforcement, and interdiction; allowing legal supply from hunting or farming; alternative livelihoods; anti-money-laundering efforts; and demand reduction strategies. This is an urgent book offering meaningful solutions to one of the world's most pressing crises.

An intrepid investigation of the criminal world of wildlife trafficking--the poachers, the traders, and the customers--and of those fighting against it Journalist Rachel Nuwer plunges the reader into the underground of global wildlife trafficking, a topic she has been investigating for nearly a decade. Our insatiable demand for animals--for jewelry, pets, medicine, meat, trophies, and fur--is driving a worldwide poaching epidemic, threatening the continued existence of countless species. Illegal wildlife trade now ranks among the largest contraband industries in the world, yet compared to drug, arms, or human trafficking, the wildlife crisis has received scant attention and support, leaving it up to passionate individuals fighting on the ground to try to ensure that elephants, tigers, rhinos, and more are still around for future generations. As Reefer Madness (Schlosser) took us into the drug market, or Susan Orlean descended into the swampy obsessions of The Orchid Thief, Nuwer--an award-winning science journalist with a background in ecology--takes readers on a narrative journey to the front lines of the trade: to killing fields in Africa, traditional medicine black markets in China, and wild meat restaurants in Vietnam. Through exhaustive first-hand reporting that took her to ten countries, Nuwer explores the forces currently driving demand for animals and their parts; the toll that demand is extracting on species across the planet; and the conservationists, rangers, and activists who believe it is not too late to stop the impending extinctions. More than a depressing list of statistics, Poached is the story of the people who believe this is a battle that can be won, that our animals are not beyond salvation.

What awaits us in the 2020s and 2030s? Will the country continue down the path of state capture, corrupt leadership and economic downturn? Or can South Africa rise from Jacob Zuma's lost decade? Frans Cronje analyses where we are, predicts where we are headed, and warns that there is not much time left to prepare for our future.

Few people have courted as much controversy or evoked such strong and divergent emotions as Winnie Madikizela-Mandela. Adored by some, abhorred by others, she bears a name famous throughout the world, yet not many people know the woman behind the headlines, myths and controversies, or the details of the fascinating story that is her life. This intimate, in-depth and unbiased biography reveals the enigma that is Winnie Mandela, by exploring both her personal and political life. The reader is given a rare glimpse into Winnie's strict yet happy rural upbringing, where the foundations were laid for her faith, compassion and indomitable resolve. As a young social worker in 1950s Johannesburg, her beauty, style and character captivated the political activist and Tembu prince, Nelson Mandela. Together, they personified the rising aspirations and political awakening of their people, and, in so doing, inspired a nation. Through her fierce determination and dauntless courage, she survived her husband's imprisonment, continuous harassment by the security police, banishment to a small Free State town, betrayal by friends and allies, and more than a year in solitary confinement - all the while keeping the struggle flame alight and the name of Nelson Mandela alive. A sensitive and balanced portrayal, the book nevertheless thoroughly investigates and honestly examines the controversies that have dogged Winnie Mandela in recent years: the allegations of kidnapping and murder, her divorce from Mandela, and the charges of fraud. Winnie Mandela: A Life takes the reader on a remarkable journey of understanding, painting a rich, warm and vivid portrait of one of the world's most charismatic, yet enigmatic, women.

"If you've been looking for something different to level up your health, fitness, and personal growth, this is it."—Melissa Urban, Whole30 CEO and New York Times bestselling author Discover the evolutionary mind and body benefits of living at the edges of your comfort zone and reconnecting with the wild. In many ways, we're more comfortable than ever before. But could our sheltered, temperature-controlled, overfed, underchallenged lives actually be the leading cause of many of our most urgent physical and mental health issues? In this gripping investigation, award-winning journalist Michael Easter seeks out off-the-grid visionaries, disruptive genius researchers, and mind-body conditioning trailblazers who are unlocking the life-enhancing secrets of a counterintuitive solution: discomfort. Easter's journey to understand our evolutionary need to be challenged takes him to meet the NBA's top exercise scientist, who uses an ancient Japanese practice to build championship athletes; to the mystical country of Bhutan, where an Oxford economist and Buddhist leader are showing the world what death can teach us about happiness; to the outdoor lab of a young neuroscientist who's found that nature tests our physical and mental endurance in ways that expand creativity while taming burnout and anxiety; to the remote Alaskan backcountry on a demanding thirty-three-day hunting expedition to experience the rewilding secrets of one of the last rugged places on Earth; and more. Along the way, Easter uncovers a blueprint for leveraging the power of discomfort that will dramatically improve our health and happiness, and perhaps even help us understand what it means to be human. The Comfort Crisis is a bold call to break out of your comfort zone and explore the wild within yourself.
