This June and July, the Urban Economics Association is organizing a weekly online lecture series on urban economics. The purpose of these lectures is to provide PhD students, post-docs and junior faculty with an introduction to the current research frontier in urban economics. We interpret urban economics broadly, including housing, real estate, transportation, local public good provision, the spatial distribution of activities, economic geography, and urban or regional policy. Schedule. 11 ...

A rigorous but nontechnical treatment of major topics in urban economics. Lectures on Urban Economics offers a rigorous but nontechnical treatment of major topics in urban economics. To make the book accessible to a broad range of readers, the analysis is diagrammatic rather than mathematical. Although nontechnical, the book relies on rigorous economic reasoning. In contrast to the cursory theoretical development often found in other textbooks, Lectures on Urban Economics offers thorough and exhaustive treatments of models relevant to each topic, with the goal of revealing the logic of economic reasoning while also teaching urban economics. Topics covered include reasons for the existence of cities, urban spatial structure, urban sprawl and land-use controls, freeway congestion, housing demand and tenure choice, housing policies, local public goods and services, pollution, crime, and quality of life. Footnotes throughout the book point to relevant exercises, which appear at the back of the book. These 22 extended exercises (containing 125 individual parts) develop numerical examples based on the models analyzed in the chapters. Lectures on Urban Economics is suitable for undergraduate use, as background reading for graduate students, or as a professional reference for economists and scholars interested in the urban economics perspective.

A rigorous but nontechnical treatment of major topics in urban economics. Lectures on Urban Economics offers a rigorous but nontechnical treatment of major topics in urban economics. Perspectives in Computation covers three broad topics: the computation process & its limitations; the search for computational efficiency; & the role of quantum mechanics in computation.

Urban planning is as broad as the scope of urban government, which is closest to the people. It is an essential pre-requisite to the successful performance of duties of urban government, because it does offer most logical approach to solving city's problems, arising from rapid urban growth and expansion, as well as from changing conditions affecting inner city. This book is about establishing what has gone wrong with urban planning in Delhi, and of fixing flawed urban planning in operation. In this context, it is pertinent to have an understanding of the metropolis of Delhi, as much as the urban planning process. The book describes the metropolis through its morphology, its socioeconomic profile, the way rich and the poor live, its built environment, mode of travel, and the administrative aspects of urban planning. This book is not only for town planners but also for the citizens of Delhi, with the intention of making them more aware and enlightened about urban planning and urban governance. Urban planning is making decisions that profoundly affect the form and character of Delhi metropolis, in which its citizens live and the manner of their lives.

Walt Johnson has been a rolling stone most of his life, moving from town to town and living on the edges of homelessness. Now he has run out of time as lung cancer has left him only months to live. Walt then begins a quest to find the son with whom he lost contact decades earlier. Out of money, he lands a job at a small-town restaurant in an attempt to save enough to buy a bus ticket to the last known whereabouts of his son. The friends Walt makes at his new job soon become family for him, especially 14-year-old Danny who is emotionally paralyzed at the loss of his own father in Iraq. Faced with Danny's struggles to grow up and the struggles of his other new friends, Walt comes to realize he is not only on a journey to find his own son, but he is on a journey to find himself worthy of being a father.

Lecture Notes in Urban Economics and Urban Policy provides a wide-ranging introduction to urban economics and urban policy by Professor John Yinger, one of the world's leading scholars in urban economics. It draws on his extensive teaching and publication record to provide detailed lecture notes for both a PhD level course in urban economics and a master's level course in urban policy. Both the US and the world populations are becoming more and more urbanized, and these notes are designed to help scholars learn and teach about the factors that determine urban residential structure and that lead to urban problems such as inadequate housing, concentrated poverty, an inequitable distribution of local public services, racial and ethnic discrimination in housing, and traffic congestion. Although these notes focus on the US, many of the lessons in the notes apply to other countries as well. They also draw on Professor Yinger's extensive teaching experience and publication record in urban economics and should prove useful to many scholars who want to teach about or study urban areas. Contents: Urban Economics: The Basic Urban Model 1: AssumptionsThe Basic Urban Model 2: SolutionsThe Basic Urban Model 3: Comparative StaticsMore General Treatment of Housing DemandEstimating Housing DemandThe Urban Transportation SystemMultiple Worksites and Full Labor MarketsHousehold HeterogeneityTesting Urban ModelsNeighborhood AmenitiesBidding and Sorting: The Theory of Local Public FinanceProperty Tax CapitalizationHedonic RegressionsSchool-Quality CapitalizationHousing DiscriminationNotes Based on: "Now You See It, Now You Don't: Why Do Real Estate Agents Withhold Available Houses from Black Customers?"Homeownership Gaps Between Ethnic GroupsResidential Segregation: Measurement, Causes, ConsequencesMortgage Markets and Predatory LendingMortgage DiscriminationUrban Policy: IntroductionEvaluating Social ProgramsHousing Concepts, Household BidsHousehold Sorting and Neighborhood AmenitiesNeighborhood ChangeOverview of Housing MarketsHousing Problems and Federal Housing ProgramsHomelessnessRace and Ethnicity, Prejudice and DiscriminationHousing Discrimination and Its CausesResidential Segregation: Measurement, Causes, ConsequencesMortgage Markets and Predatory LendingDiscrimination in Mortgage LendingPoverty: Concepts and EvidenceConcentrated PovertyWelfare Programs and Principles of Welfare PolicyThe New World of Welfare PolicyUrban Labor MarketsHuman Capital Programs to Promote Community DevelopmentFinancial Capital Programs to Promote Community DevelopmentKey Issues in Studying Urban Crime Readership: Students and academics interested in urban economics and urban policy. An effective program for preparing to take the TOEFL (Test of English as a Foreign Language) exam, especially for Spanish speakers. Ideal for group or self -study. Answer key is included in this edition. An advanced grammar course, appropriate for pre-iBT, ITP paper-based TOEFL prep and English Teacher Training. Here, for the first time, a unique approach to preparing to take the TOEFL exam--especially for Spanish speakers. Focused on the Grammar section with five steps, this program also includes strategies for the Listening Comprehension section, guidelines for success in the Reading section, and expert tips and sample topics for the iBT Written Essay. Includes useful appendices for reference. To see useful Amazon book reviews, kindly refer to the listing for "TOEFL Prep for Spanish Speakers", the original book on which this title is based. For info. on all 12 titles in this series, visit www.5steptoflprep.com.

For decades US politicians have been kicking the federal deficit and overspending can down the road. No politician can get elected by running on a platform that will honestly fix the US economy. At no time in history has it been more crucial than now for each of us to understand our government. In order to do so, we must understand economics, politics, and the difference between the two. We are the richest country in history but yet we sit on the edge of financial disaster. How can we expect that to change if voters don't understand the very basics of economics? There has never been a source of information on economics that people can easily understand, UNTIL NOW. Author Marshall Payn, with a degree in Economics from M.I.T., believes that the current presentation of economics in our educational system is the biggest obstacle in understanding economics. He developed his unique approach while working in the field of vocational education, i.e. getting fundamental information from one mind to another. In clear and simple terms, this book separates truth from emotion, economics from politics, and offers undeniable proof of our country's destiny if each of us continues to elect politicians while lacking a clear understanding of basic economic principles. If you think you understand economics, think again. This book is an eye opener, not only with its content, but because these concepts are so simple. What is truly amazing is that the knowledge in this book is not common knowledge. You cannot call yourself a responsible citizen unless you read How to Understand Economics in 1 Hour prior to voting in the 2012 US election. It will change the way you see the government, politicians, and the future of our country.
