In *Asymmetric Returns*, financial expert Alexander Ineichen elevates the critical discussion about alpha versus beta and absolute returns versus relative returns. He argues that controlling downside volatility is a key element in asset management if sustainable positive compounding of capital and financial survival are major objectives. Achieving sustainable positive absolute returns are the result of taking and

managing risk wisely, that is, an active risk management process where risk is defined in absolute terms and changes in the market place are accounted for. The result of an active risk management process-when successful-is an asymmetric return profile, that is, more and higher returns on the upside and fewer and lower returns on the downside. Ineichen claims that achieving Asymmetric Returns is the future of active asset management. Alexander M. Ineichen, CFA, CAIA, is Managing Director and Senior Investment Officer for the Alternative Investment Solutions team, a

key provider within Alternative and Quantitative Investments, itself a business within UBS Global Asset Management. He is also on the Board of Directors of the Chartered Alternative Investment Analyst Association (CAIAA). Ineichen is the author of the two UBS research publications In Search of Alpha—Investing in Hedge Funds (October 2000) and The Search for Alpha Continues—Do Fund of Hedge Funds Add Value? (September 2001). As of 2006 these two reports were the most often printed research papers in the documented history of UBS. He is also author of

powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles

(ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion:

these machines cannot be operated without loss of life and loss of habitat.

Unique among his fellow immortals and mortal folk alike, Jant Comet can fly. His talent is a gift and a curse that has earned him a place in the Castle Circle as Messenger to the Emperor San -- soaring high and free above the bloody battlefields of his world, carrying word back to his master of progress and regress in the ever-escalating conflict between man and the awful armies of giant, flesh-devouring insects. But while Jant's duty is to remain neutral in

the petty squabbles and power plays of the fifty who will neither age nor die naturally, bitter rivalries that have festered for centuries now threaten to incite a savage civil war. And Jant may be the only being alive capable of stemming the onrushing tide of destruction and the unstoppable insect infestation. For only he can gain entrance -- through extreme doses of the narcotic that owns his soul -- into a place of darkest wonders and revelations; a strange and horrific alternate reality that none but Jant Comet believes exists. A literary triumph
