The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to

undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago-Iwoye. Ogun State.

Daniel C. Liebler masterfully introduces the science of proteomics by spelling out the basics of how one analyzes proteins and proteomes, and just how these approaches are then employed to investigate their roles in living systems. He explains the key concepts of proteomics, how the analytical instrumentation works, what data mining and other software tools do, and how these tools can be integrated to study proteomes. Also discussed are how protein and peptide separation techniques are applied in proteomics, how mass spectrometry is used to identify proteins, and how data analysis software enables protein identification and the mapping of modifications. In addition, there are proteomic approaches for analyzing differential protein expression, characterizing proteomic diversity, and dissecting protein-protein interactions and networks.

I know who I am Kelvin seemed desperate to win his father's approval. However, Mr Eze not only seemed unwilling to bestow it, but hell bent in making life unbearable for his acclaimed son. Kelvin thought it would be best to find his true family rather than endure the torture of being the unwanted child. He realised that his quest for recognition was unlikely to succeed, so he set his eyes on freedom. In the meantime, Kelvin expected that a good academic performance would change his luck and put him right with Mr Eze or at least boost his confidence in his abilities. With all his attention on his studies, competing for the best grades against the leading brains in his class, especially Christian, an indomitable rival, he would not let school romance get in the way fo his goal. But slowly and steadily, Chioma, gained his trust and won him over. He would have to make a decision between holding on to his moral principle or satisfying his human desire for friendship. New Home, New Identity Marginalised and decimated, the Biafran people were forced to go to war and secede from Nigeria. But decades after losing the war and embracing the Nigerian identity, they are still not treated as equal citizens in their home country. As a new wave of terrorism sweeps the northern parts of the country, the Biafran people, predominantly Igbo are again decimated as they have been for decades in every crises and this led to renewed discussions about their independence. For Biafra, the fight for equality was over and their Sovereignty was not negotiable. For Kelvin, it wasn't very different, and so his quest for truth and independence must begin. His compulsory holiday in Igbo land would expose him to the truth that might have indirectly caused him to abandon his academic pursuit. Perhaps, it was just an excuse to free himself from the clutch of Mr Eze and begin his quest for the truth about his identity.
