~~PTO will not engage. (Hydraulic) Insufficient hydraulic pressure. Confirm 130-150 psi at "CL" port in solenoid manifold. If less, check hose connection to transmission. Misplacement of 90° orifice fitting (43T37385, silver color). Install orifice fitting in port on the bottom of the PTO housing. See PTO Installation and Owners Manual for location.~~

~~PTO Troubleshooting guide Muncie Power Products~~

~~The correct backlash for most Muncie Power Products' PTOs is .006" to .012". Too small of tolerance of backlash will cause a whining noise and excess pressure on the idler shaft and bearings. Too much backlash will cause a chattering noise. The chattering noise may diminish when RPMs are increased or the PTO is put under a load.~~
