Introductory psychology courses can raise significant questions about the nature of being human. Christianity, with its emphasis on humans made in the image of God, has a clear perspective. Psychology offers answers too, but they are often subtly implied. This introductory guide, drawn from more than fifty years of classroom experience, provides students with a coherent framework for considering psychology from a Christian perspective. The authors explore biblical themes of human nature in relation to all major areas of psychology, showing how a Christian understanding of humans can inform the study of psychology. Brief, accessible chapters correspond to standard introductory psychology textbooks, making this an excellent supplemental text. End-of-chapter questions are included. A test bank for professors is available through Baker Academic's Textbook eSources.

Today we face a tremendous weakening of confidence in the Bible. This is just as true for the pastor offering counsel in his office as it is for the person in the pew talking with a struggling friend at Starbucks or the small group leader who is unsure of what to say to a hurting group member. We need to regain our confidence in God's Word as sufficient to address the real life issues we face today. We need to understand how the Bible equips us to grow in counseling competence as we use it to tackle the complex issues of life. Scripture and Counseling is divided into two sections of nine chapters each: Part One helps readers to develop a robust biblical view of Scripture's sufficiency for "life and godliness" leading to increased confidence in God's Word. Part Two assists readers in learning how to use Scripture in the counseling process. This section demonstrates how a firm grasp of the sufficiency of Scripture leads to increased competence in the ancient art of personally ministering God's Word to others. Part of the Biblical Counseling Coalition series, Scripture and Counseling brings you

It blends theological wisdom with practical expertise and is accessible to pastors, church leaders, counseling practitioners, and students, equipping them to minister the truth and power of God's word in the context of biblical counseling, soul care, spiritual direction, pastoral care, and small group facilitation.

This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. This text highlights human development, brain function, abnormal psychology, and the individual differences in each area as cut-across themes to demonstrate these connections. Also included are two-page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza, study psychology, or listen to music. The art featured in these spreads have been created especially for Psychology Around Us by an award-winning artist with input from faculty on how it will contribute to teaching and learning.
