After a decade of making documentaries about offbeat characters on the fringes of US society, Louis had the urge to return to America and track down the people who most fascinated him. It would be a reunion tour, but this time without the cameras and the sense of performance being filmed inevitably brings. It would allow him to get closer to people, to discover what really motivated them and what had happened to the assorted dreamers, outlaws and eccentrics since he last saw them. On a journey that took him from the porn sets of Los Angeles to the gangsta rappers of Memphis, from a convention of UFO contactees in Arizona to Northern Idaho for a festive get-together of neo-Nazis, he asked what 'weird people' have to tell us about our own secret natures. Had he learned anything about himself by being among them? Do we choose our beliefs or do our beliefs choose us? Louis Theroux's first book is a hilarious, thought-provoking and at times surreal voyage into the heart of weirdness.

Massachusetts and weird: not too much of a stretch, some would say. But the authors dug a little deeper and found all kinds of local legends, bizarre beasts, surprising cemeteries, and uncovered the best kept secrets from all over the Bay State. If it's unusual or unexplainable or fantastic, and in the Bay State, you'll find it all here.

As all good Wisconsinites know, there's a lot more to the Badger State than, well, badgers. We have cows, cheese, the Packers, bratwurst, lakes, the Packers, polkas, cornfields, and the Packers. But Wisconsin is also filled to the brim with weirdness. And the best chroniclers of our state's odd folks, strange beasts, and local legends are Linda S. Godfrey and Richard D. Hendricks, both firm believers that Wisconsin is one of the most bizarre states in the whole nation. For years, Linda and Richard have looked for the offbeat and found it just about everywhere. Whether it's traveling down Bray Road looking for its famed beast, researching the scalped lady of Prairie du Chien, or hanging out in Haunchyville, our fearless reporters, with cameras and notebooks in hand, have uncovered more weirdness than any one state has a right to have. So grab a hunk of cheese and start browsing. Visit Burlington's Spinning Top Museum, hear about Washington County's Goatman, and recoil at the worm shower of Palmyra. Take a look at Highway 13's Reptile Man, see the World's Largest Six Pack, get spooked over the ghosts of Kenosha and the haunted bridges of Stevens Point. Meet Madison's Loony Lawyer, have a Bud with Elvis at his tavern in Phillips (honest!), and learn about the Willy Wizard of Waukesha. It's all wild, all weird, and all Wisconsin.

A brand new entry in the best-selling Weird U.S. series, Weird New England proves without a doubt that the pilgrims landed in one very strange spot. So travel down our region's highways and byways with your tour guide par excellence, and learn all the stuff about New England that our school marms never taught us. Colonists, clambakes, and the Coast Guard. Sure, those things define New England, as do witches and whale watching. And don't forget the Red Sox and the Patriots. But there's more. New England is also filled to the brim with serious strangeness. And there's no one better to chronicle the odd goings-on in our patriotic, but extremely weird section of the country than Joe Citro, a citizen in full possession of the 'weird eye.' For years, Joe has traveled our six states with camera and notepad in hand, mosquito netting or snowshoes firmly in place, in search of the bizarre and the offbeat. And he found them everywhere. He has tracked down some unbelievable tales that have just enough truth in them to create the same uneasiness a chance meeting with Lizzie Borden's ghost would.We promise; it's a journey you'll never forget.

This thoughtful examination of a century of travel writing about the American West overturns a variety of popular and academic stereotypes. Looking at both European and American travelers' accounts of the West, from de Tocqueville's Democracy in America to William Least Heat-Moon's Blue Highways, David Wrobel offers a counter narrative to the nation's romantic entanglement with its western past and suggests the importance of some long-overlooked authors, lively and perceptive witnesses to our history who deserve new attention. Prior to the professionalization of academic disciplines, the reading public gained much of its knowledge about the world from travel writing. Travel writers found a wide and respectful audience for their reports on history, geography, and the natural world, in addition to reporting on aboriginal cultures before the advent of anthropology as a discipline. Although in recent decades western historians have paid little attention to travel writing, Wrobel demonstrates that this genre in fact offers an important and rich understanding of the American West—one that extends and complicates a simple reading of the West that promotes the notions of Manifest Destiny or American exceptionalism. Wrobel finds counterpoints to the mythic West of the nineteenth century in such varied accounts as George Catlin's Adventures of the Ojibbeway and Ioway Indians in England, France, and Belgium (1852), Richard Francis Burton's The City of the Saints (1861), and Mark Twain's Following the Equator (1897), reminders of the messy and contradictory world that people navigated in the past much as they do in the present. His book is a testament to the instructive ways in which the best travel writers have represented the West.

Explores ghosts and haunted places, local legends, cursed roads, crazy characters, and unusual roadside attractions found in Michigan.

Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today.

A guide to the odd and interesting history, places, and people in Kentucky.

This book is a travel guide of sorts to New York's local legends and best kept secrets, filled with crazy characters, cursed roads, abandoned sites, and bizarre roadside attractions that the author feels reflect the shared modern folklore of our time.
