Throughput Accounting is a management accounting technique used as the performance measure in the Theory of Constraints (TOC). It is the business intelligence used for maximizing profits, however, unlike cost accounting that primarily focuses on 'cutting costs' and reducing expenses to make a profit, Throughput Accounting primarily focuses on generating more throughput.

Throughput accounting - Wikipedia

Throughput Accounting is a different approach in management accounting as it treats only the direct material as the variable cost. All other cost is considered as the fixed cost. So, it means that profit can be improved only by reducing the fixed overheads. It revolves around the bottlenecks or scarce resources.

Throughput is calculated as $\text{selling price} - \text{direct material cost}$. This is different from the calculation of contribution , in which both labour costs and variable overheads are also deducted from selling price. It is an important distinction because the fundamental belief in throughput accounting is that all

The theory of constraint can help for focus and structure for a company adopting a total quality management approach. Product costing faces large changes which may not be line with the company's accounting policies. Adopting this theory helps in cycle-time reductions and on-time performance, which are critical areas for improving productivity.

that the theory of constraints and throughput accounting (TOC/TA) is not the only approach used in decision making. Other methods are: $\text{standard cost accounting}$ $\text{activity based costing}$ marginal costing . The general hypothesis of TOC/TA is that constraints are impediments to achieving a firm's goal and their impact reduces profits.

Throughput accounting ratio (TPAR) = Return per factory hour/cost per factory hour. In any organisation, you would expect the throughput accounting ratio to be greater than 1. This means that the rate at which the organisation is generating cash from sales of this product is greater than the rate at which it is incurring costs.
