The first edition of BANK 2.0—#1 on Amazon's bestseller list for banking and finance in the US, UK, Germany, France, and Japan for over 18 months—took the financial world by storm and became synonymous with disruptive customer behaviour, technology shift, and new banking models. In BANK 3.0, Brett King brings the story up to date with the latest trends redefining financial services and payments—from the global scramble for dominance of the mobile wallet and the expectations created by tablet computing to the operationalising of the cloud, the explosion of social media, and the rise of the de-banked consumer, who doesn't need a bank at all. BANK 3.0 shows that the gap between customers and financial services players is rapidly widening, leaving massive opportunities for new, non-bank competitors to totally disrupt the industry. "On the Web and on Mobile, the customer isn't king—he's dictator. Highly impatient, skeptical, cynical. Brett King understands deeply what drives this new hard-nosed customer. Banking professionals would do well to heed his advice."

informed. Banks that don't follow his advice are dinosaurs and will definitely be left behind, and will most probably go out of business. Brett King, Author of Breaking Banks and Founder of Moven [www.brettking.com](http://www.brettking.com) Searching Finance is delighted to announce the publication of Smarter Bank by Ron Shevlin, author of the popular marketing and financial services blog, Snarketing. At the moment, the banking industry is actually fairly profitable. But respectable? Not quite. Profitable and respectable need not be mutually exclusive. In short, it's about how to become a "smarter" bank.
