### ~~Surveying Total Station Solutions | Leica Geosystems~~

And the accuracy is equal to any comparable manual total station. How is productivity increased vs. with a manual instrument? SD: With a one-man robotic instrument, you can record an average of 600-1,500 points in a day, depending on the terrain and variables. With a two-man manual station, you may only be able to record 250-400 points per day.
