In one episode of Dragon Tales, Ord accidentally gets trapped inside a giant bubble when he and Max are playing around with creating big bubbles from a spring. The bubble mix they used was so strong that trying to pop Ord's bubble with a claw or a barrette doesn't work, and they have to cart his bubble (and him) to a cold region where it freezes over and they then shatter it to finally let him out.

Inside the bubble, Trump literally can do no wrong. His often-repeated description of himself as now “immune” from the coronavirus may strike the rest of the country as silly boasting; within the bubble, it’s a powerful metaphor for his status as übermensch. But nothing in life – certainly nothing in politics – comes cost-free.

This book offers a critical assessment of the history of the euro, its crisis, and the rescue measures taken by the European Central Bank and the community of states. The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter, deprived them of their competitiveness, and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008. As private capital shied away from the southern countries, the ECB helped out by providing credit from the local money-printing presses. The ECB became heavily exposed to investment risks in the process, and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit, which itself had replaced the

dwindling private credit. The interventions stretched the legal structures stipulated by the Maastricht Treaty which, in the absence of a European federal state, had granted the ECB a very limited mandate. These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB's Governing Council. This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy, without solving southern Europe's competitiveness problem. It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB, exiting the regime of soft budget constraints and writing off public and bank debt to help the crisis countries breathe again. At the same time, the Eurosystem should become more flexible by offering its members the option of exiting and re-entering the euro - something between the dollar and the Bretton Woods system - until it eventually turns into a federation with a strong political power centre and a uniform currency like the dollar.

Kevin Ryan is a writer in the much-maligned genre of true crime who desperately needs a devious, over-the-top story for the subject of his next book. How else can he keep his wife Valerie's roots dyed and keep himself from handing out taco samples at the local supermarket? When Kevin isn't Googling himself or spot checking his books' stock at stores around the country or online, he's bringing the hazards (ie,

criminals and other crazies) of his job home to wife Val and twin daughters Taylor and Hayley. Kevin is on the hunt for the big one, the story that could break him out of the mid-list and onto the bestseller lists. And then there's a knock at the door--a story finds him...A distraught 20-year old Jett Carter shows up at the Ryan house because her mother and sister are imprisoned--perhaps if Kevin writes their story and reveals the truth, he might help exonerate them. The Carters' tale is the perfect white-trash-attempted-murder-love-triangle that Kevin's editor will love and his fans will devour. He begins to write "Love You to Death." Then on a beautiful summer day, the wheels of homicide are set in motion and Kevin's own story begins to eclipse the crime he is chronicling. When his #1 fan is murdered and another body turns up, the Ryans' life in Port Gamble and all that Kevin holds dear is in jeopardy. Somewhere in "Love You to Death" and within the "bunch of low rent losers" he's interviewing is the killer.
