Methods of valuation of environmental goods and services may broadly be classified into two categories: (1) Pecuniary, and (2) non-pecuniary.

Pecuniary valuation methods obtain the 'money equivalent' of these goods and services – money is used as the numéraire, while non-pecuniary methods, more

The practice of putting a price tag on environmental natural resources is not without its limitations. The first of these relates to accuracy: considering the complex, non-linear nature of ecosystems, valuing the worth of their non-marketed goods can be an imprecise exercise. This uncertainty needs to be acknowledged in
